

MRC 88

MRC88 is a deep cleaning metering roller cleaner used to remove ink and other contaminants. While it is a lower vapor pressure cleaner, it has excellent evaporation characteristics without using chlorinated solvents. MRC88 quickly lifts the ink off the dampening rollers and does not contaminate the water circulation system.

Recommendations for use:

Pour a liberal amount of MRC88 onto a shop towel and wipe back and forth over the entire length and circumference of the metering roller. Repeat until the roller is clean and free of ink and other contaminants.

Physical and chemical properties:

- Appearance: Liquid
- Solubility: Not soluble in water
- VOC: 800 g/l
- Colour: Clear
- Boiling point: 100-142°C
- pH concentrate: N/A
- Odour: No characteristic odour
- Relative density: 0.80 @ 20°C
- Flash point: < 10°C
- Packaging: 1 liter / 1 box x 12 liters

Advantages:

- Lower vapor pressure
- Good evaporation characteristics, no greasy residue
- No 1.1.1-Trichloroethane which is used in many metering roller cleaners
- Quickly removes ink and other contaminants
- No methyl chloride
